I use **Cloudbeds** every day. At Ultra Infinity Hotel I handle reservations, rates, availability and property configuration; before that I spent a year on the front desk of a beach resort running the nightly audit on a PMS — reconciling the day's transactions, revenue and payment methods before closing the system. I also build software: I am the founder and lead developer of AsistoYA, a multi-tenant SaaS in production (3rd place nationally, MESCyT 2025, RD$400,000 in seed capital), where I onboard each new school myself, importing and validating their records before go-live. I know what a property's data means operationally, and I know how to clean, map and move it.

HOSPITALITY EXPERIENCE

Web Administrator & Reservations Agent — Ultra Infinity Hotel, Dominican Republic — Mar 2026 – Present

- Daily operator of **Cloudbeds**: reservations, rate plans, availability and property configuration.
- Keep rates and inventory consistent across the booking engine and OTA channels, catching mismatches between what the PMS holds and what the guest sees.
- Administer the hotel website on WordPress/Elementor: content updates, booking engine configuration and page optimization.
- Front desk operations: check-in/check-out, guest requests and reservation management across direct and OTA channels.

Front Desk Agent & Night Auditor — Velero Beach Resort, Dominican Republic — Apr 2025 – Feb 2026

- Ran the nightly audit on Hotello (PMS): reconciled the day's transactions, revenue and payment methods across front desk and restaurant, resolved discrepancies and closed the system.
- Managed reservations, check-in/check-out, billing and cash handling for national and international guests.
- Worked OTA channels daily (Booking.com, Expedia); handled special requests and incident resolution.

TECHNOLOGY & DATA EXPERIENCE

Founder & Lead Developer — AsistoYA · asistoya.com — Aug 2025 – Present

- Multi-tenant SaaS for school attendance, with separate dashboards for administrators, teachers and parents, each restricted to its own school's data.
- Onboard every new school personally: import and validate student, staff and course records from the spreadsheets they already keep, then train their team on the reports.
- Real-time attendance with automatic notifications to families; daily, weekly and monthly reporting for schools and the Ministry of Education.
- Subscription billing, progressive web app with push notifications, and a mobile app published on Google Play and the App Store.
- **3rd place nationally — MESCyT National Entrepreneurship Competition 2025, selected from 40 ideas across 21 universities; RD$400,000 in seed capital.**

React · TypeScript · Computer Vision · Node.js · Tailwind CSS

Front-End Developer, Internship — El Pensum — Nov 2025 – Feb 2026

- Built interactive interfaces in Angular and TypeScript for a platform to explore Dominican universities and academic programs; integrated academic data via JSON and contributed to the digital payments module.

Administrative Assistant — EyP Multiservices (Claro) — Nov 2024 – Mar 2025

- Worked daily in CRM and ERP portals: document management, invoicing, process organization and incident resolution.
- Customer and technical support for clients and sales promoters; Excel, Google Workspace and AnyDesk.

Accounting Assistant — Lic. Wilson Manuel Sosa, CPA Jul 2023 – May 2024

- Data entry and filing of tax records to the DGII (forms 606 and 607), with the precision that financial records demand.
- Organized and validated invoices and financial documentation; in-person and phone support to clients.

PROJECTS

Night Audit System — Web application for hotels Jul 2025 – Aug 2025

- Digitized the hotel night-audit process I was running by hand: check-ins and check-outs, automated billing, sales breakdowns by category, shift and payment method, and a countdown to the system close.

React · TypeScript · Tailwind CSS

EDUCATION

B.Sc. Software Engineering — Universidad Abierta para Adultos (UAPA) Nov 2024 – Nov 2028 (expected)

Technical Baccalaureate in Administrative & Tax Management — Politécnico Prof. Juan Emilio Bosch Gaviño 2021 – 2024
