I build and run software in production. I am the founder and lead engineer of AsistoYA, a multi-tenant school attendance SaaS in production at schools in Mexico: a React + TypeScript web app shipped to iOS and Android with Capacitor, Node.js serverless functions, a gateway for Hikvision facial terminals, and a self-hosted Appwrite stack I migrated to an Oracle Cloud ARM server. I also build open-source developer tooling, such as SyntaxRAG, a local MCP code search engine that cut an AI agent's token use by 63.9% in measured benchmarks. Before and alongside that, two years in client-facing operations (hotel PMS, night audit, technical support) taught me to debug with the user in front of me.

EXPERIENCE

Founder & Lead Developer — AsistoYA · asistoya.com — Aug 2025 – Present

- Built and run a multi-tenant SaaS for school attendance: dashboards for administrators, teachers and parents, each scoped to its own school's data; apps on Google Play and the App Store from one React + TypeScript codebase (Capacitor).
- Migrated production from Appwrite Cloud to self-hosted Appwrite (Docker) on Oracle Cloud ARM, adding a webhook-fed SQLite read replica so heavy reports never hit the primary.
- Integrated Hikvision facial terminals over ISAPI (XML access events) and real-time parent notifications for entries, exits and late arrivals.
- Debugged a webhook worker leaking one file descriptor per failed delivery (23 h without deliveries); fixed limits and added a systemd watchdog. Load-tested with k6 and JMeter to find the ceiling (~110 reads/s, CPU-bound) before onboarding more schools.
- First-line support for every school: reproduce the issue, find the root cause, ship the fix; errors triaged through Sentry.
- **3rd place nationally — MESCyT National Entrepreneurship Competition 2025, selected from 40 ideas across 21 universities; RD$400,000 in seed capital.**

React · TypeScript · Node.js · Appwrite · Docker · Oracle Cloud · SQLite · Capacitor · Sentry

Web Administrator & Reservations Agent — Ultra Infinity Hotel — Mar 2026 – Present

- Daily operator of Cloudbeds (PMS): reservations, rate plans, availability and property configuration.
- Keep rates and inventory consistent between the booking engine and OTA channels, catching mismatches before they reach the guest.
- Administer the hotel website on WordPress/Elementor: content updates, booking engine configuration and page optimization.

Front-End Developer, Internship — El Pensum — Nov 2025 – Feb 2026

- Built interactive interfaces in Angular and TypeScript consuming JSON APIs, for a platform to explore Dominican universities and academic programs.
- Contributed to the digital payments module.

Front Desk Agent & Night Auditor — Velero Beach Resort — Apr 2025 – Feb 2026

- Ran the nightly audit on Hotello (PMS): reconciled the day's transactions, revenue and payment methods across front desk and restaurant, resolved discrepancies and closed the system.
- Managed reservations, check-in/check-out, billing and cash handling for national and international guests; worked OTA channels daily (Booking.com, Expedia).

Administrative & Technical Support Assistant — EyP Multiservices (Claro) — Nov 2024 – Mar 2025

- Customer and technical support for clients and sales agents, working daily in CRM and ERP portals.
- Document management, invoicing, process organization and incident resolution; remote assistance via AnyDesk.

PROJECTS

SyntaxRAG — Open-source MCP code search for AI agents · github.com/EnmanuelReynoso23/synrag

- Local code search that chunks by AST (Tree-sitter), resolves imports like the TypeScript compiler (100% on local imports) and reranks on CPU with ONNX.
- Every published number is measured with a real agent and tied to its script in CLAIMS.md: -63.9% tokens on 10 multi-step tasks (95% CI -83% to -24%), quality from 87% to 94%.

Python · Tree-sitter · LanceDB · FlashRank (ONNX) · MCP · React 19

CompuShare — Distributed P2P LLM inference · github.com/EnmanuelReynoso23/CompuShare

- Splits an open LLM's layers across internet-connected PCs with llama.cpp RPC and a WebSocket relay that tunnels TCP without port forwarding; output traffic cut from 993 KB to 4.1 KB per token.

Python · Go · TypeScript · llama.cpp · WebSockets

Animo — Peer-to-peer virtual pet · github.com/EnmanuelReynoso23/tama-p2p

- The same JavaScript rules run unchanged on an installable PWA, a Raspberry Pi kiosk and an ESP32-C3; phones sync directly over WebRTC with no backend of my own.

TypeScript · React · Yjs · WebRTC · MQTT · Moddable SDK

AI operations bot — WhatsApp support agent for AsistoYA

- Answers parents and takes real actions on their accounts (checks, parent–child linking, password recovery), reporting each one to the team; delegates coding tasks to AI agents. Runs as a systemd service on Oracle Cloud.

Node.js · Baileys · Gemini · systemd

Night Audit System — Web application for hotels Jul 2025 – Aug 2025

- Digitized the night-audit process I was running by hand: check-ins and check-outs, automated billing, sales breakdowns by category, shift and payment method.

React · TypeScript · Tailwind CSS

EDUCATION

B.Sc. Software Engineering — Universidad Abierta para Adultos (UAPA) Nov 2024 – Nov 2028 (expected)
Technical Baccalaureate in Administrative & Tax Management — Politécnico Prof. Juan Emilio Bosch Gaviño 2021 – 2024

CERTIFICATIONS

Full Stack Developer Certification Associate — Certiplus Oct 2026
Valid until Oct 2029

TypeScript: From First Steps to Professional — Master.dev Feb 2026
8 hours · Credential ID baba173e58-jfuxcgueUy

Full Stack Web Development — Intermediate Level — Cymetria Group / INDOTEL / IDB Jan 2026
80 hours

Legacy Responsive Web Design V8 — freeCodeCamp Oct 2024
~300 hours · Credential fccc3509f1c-94fd-4e6a-9a7b-dfb836aa8fb3

Diploma Program in Databases — ITLA, Instituto Tecnológico de las Américas Aug 2026
300 hours

Front-End Web Development with Angular — ITLA, Instituto Tecnológico de las Américas Dec 2025
40 hours

Python Essentials 1 — Cisco Networking Academy Mar 2025

Scientific Computing with Python — freeCodeCamp Oct 2024
~300 hours · Credential fccc3509f1c-94fd-4e6a-9a7b-dfb836aa8fb3

SKILLS

Development	JavaScript, TypeScript, React, Angular, Python, Node.js, HTML/CSS, Tailwind CSS
Infrastructure	Linux, Docker, systemd, Oracle Cloud, Appwrite (self-hosted), Nginx, Sentry, load testing (k6, JMeter)
APIs & tooling	REST APIs, webhooks, Model Context Protocol (MCP), Git & GitHub, Vite, Vitest, progressive web apps
Data & databases	SQL, SQLite, relational database design, data cleaning and validation, reconciliation, reporting
Web	WordPress, Elementor, SEO

LANGUAGES

Spanish	Native
English	Professional working proficiency — Duolingo English Test: 115 (Mar 2026) · NLI English Diploma

Recommendation letters (UAPA Rectorate; Lic. Wilson Manuel Sosa, CPA) and references available on request.
